SYSTEMS DIVISION

What we do

This division's aim is to provide technical advice to design studios, keeping them up to date about any new technological aspect arising on the market, fully satisfying the requirements of a professional. We cooperate in drafting technical reports and any other document necessary towards achieving the completion of a project. We perform estimation surveys in the case of existing sites and we organize regulatory training sessions.

Digitec Solution Systems Division can also develop integrated solutions for special plants and custom software solutions. We constantly attend to dedicated International exhibitions: we are the the company's "eye on the world", ceaselessly researching for state-of-the-art solutions.

The Systems Division can definitely offer support for outdated plants revamping, including performance and regulatory enhancements as per current applicable regulations.

This division is also in charge of managing Digitec Solution's brands.

HYKON
VIDEO

HYKON is a TVCC product line designed for the specialist. All Hykon products are conceived to guarantee high performances, thanks to the selection of cutting edge, prime-choice components, in order to satisfy even the most demanding clients, in terms of technical performances.

Hykon products are designed to function in extreme exposition conditions, guaranteeing outstanding performances even under severe conditions of lacking of brightness and in extreme contexts. The quality choice of the Hykon product line makes the whole range of products durable and reliable.

Hykon's strict and trustworthy commercial policy makes the market players stand out, protects the supply chain and provides an ideal product for installers and System Integrators who want to stand out in the market. Hykon can safeguard your promotion and design activities.

hykon.eu

ATON is a supervisor of technological systems developed by DIGITEC SOLUTION, based on a proprietary Linux distribution (OS LINEA) and on JavaScript applications running on web browser, tapping into a relational database. This product allows the integrated management, even remotely, of different technological plants, in order to rationalize management and control posts for every single plant.

Aton integrates and manages the following technological systems:

- Home automation electrical systems
- KNX systems
- Dali, DMX, SCS systems, and many others
- Thermoregulation
- Antiintrusion systems
- TVCC systems
- Fire/gas detection systems
- Building automation systems
- Access control, electronic cylinders
- MODBUS systems
- Intercom systems

Digitec Solution can develop customized software solutions.
